

Product Data Sheet

CATEGORY: Construct

PRODUCT: Construct Wrap **general ht**

DESCRIPTION: Construct Wrap **general ht** is an interior peelable temporary protective coating offering water resistance and impact resistance that is used to protect granite, porcelain and vitrified tiles, 2-pac kitchen cupboards, stainless steel, aluminum, some painted steel, sealed timber, fiberglass or enameled baths & tubs and any non-porous substrates from damage. Construct Wrap **general ht** air-dries quickly, leaving a tough, flexible coating that can be multi-layered for added resistance and is easily removed. It is stabilised against brittleness and is not softened or penetrated by most water-based compounds.

SUBSTRATES: Stainless steel, aluminum, some painted steel, porcelain and vitrified tiles, sealed timber, granite or engineered stone, fiberglass, ceramic, enamels, some plastics and any stable non-porous substrate.

PROPERTIES: Green liquid

VISCOSITY: Approximately 5,000 mPa.s

SOLIDS: 61-63%

pH: 7.0-8.5

- water borne application
- thorough protection
- simple removal
