

## Product Data Sheet

CATEGORY:	Construct
PRODUCT:	Construct Wrap window uv ht
DESCRIPTION:	Construct Wrap window uv ht is a clear UV stable, water resistant, peelable temporary protective coating used in high temperature/humidity climates of 18°C - 45°C. Construct Wrap window uv ht is primarily used to protect glass and windows against foreign materials that the window could encounter during construction. Construct Wrap window uv ht air-dries quickly, leaving a tough, clear flexible coating that is easily removed. It is stabilised against brittleness and is not softened or penetrated by most water-based compounds.
SUBSTRATES:	Glass and windows
PROPERTIES:	White liquid
VISCOSITY:	Approximately 6,000 mPa.s
SOLIDS:	57-59%
pH:	7.0-8.5

- water borne application
- thorough protection
- simple removal
