Temporary Protection for all types of Flooring

[www.skudo.com.au](http://www.skudo.com.au)

In this fast paced world of the modern day construction site, contractors are faced with many challenges in order to turn a profit on a project...constrictive work sites, exorbitant liquidated damages just to name a few. With these pressures often leading to the workplace becoming a clambering mess as contractors and tradesmen attempt to complete their scope of work within the tight construction window they have been given.

This situation can of course manifest into a number of issues including accidents and damages, not to mention injuries or even worse. Consequently, installed construction materials particularly those that are in constant contact with trafficable trades are often at great risk for accidental damage. More often than not there is no one perpetrator that can be held accountable and so lies the question...who's responsible for fixing it once it's damaged?

Of course, its not just the damaged work that is expensive, its the costs associated with cleaning the soiled surfaces which can blow out in addition to the downtime.

**Skudo Coatings** have developed a revolutionary product for the temporary protection of surfaces with the release of Skudo Floor. A totally unique concept - Skudo Floor eliminates the issues surrounding damaged surfaces by protecting them from start to finish.

Once applied, Skudo Floor homogenises itself with the substrate to create an outer skin capable of protecting the surface from contaminants arising from the consequences of construction or remedial trades.

Skudo Floor can protect against:

- General traffic
- Most solvents\*
- Water<sup>^</sup>, paint, coffee, and other liquids\*
- Light Impact
- Dirt, grit, mud
- Plasters
- Rust stains

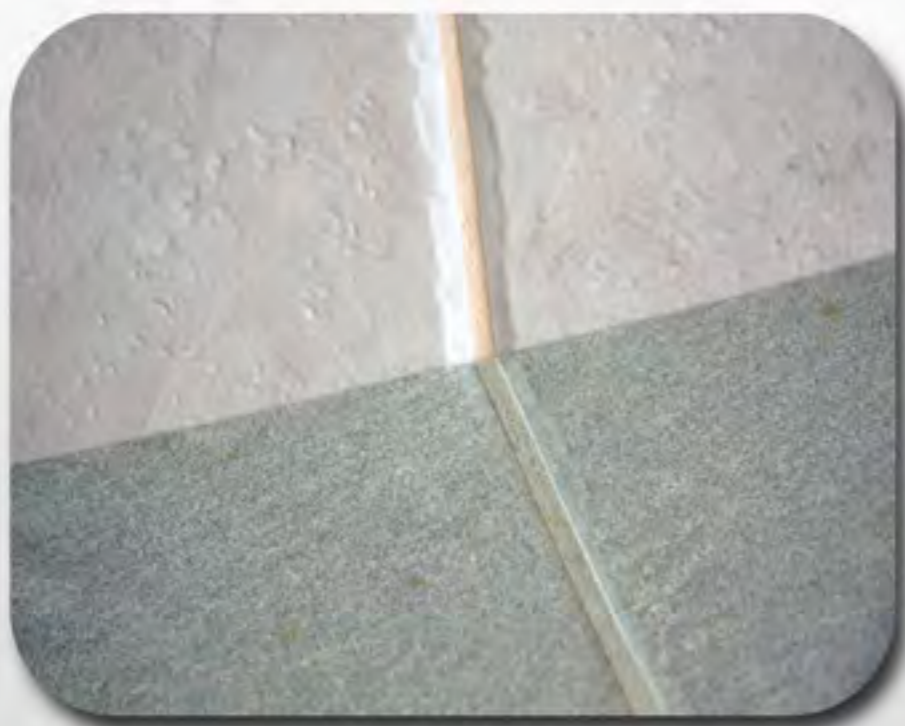

Skudo Floor is a two part water based system which is applied with Roller or Spray gun. Skudo Floor is suitable for use on nearly all internal surfaces including:

- Flooring materials including grout joints up to 5mm
- Concrete slabs, including garage slabs
- Staircases
- Granite and marble benchtops
- Showers, baths, and sinks
- Wall surfaces including bathroom tiles

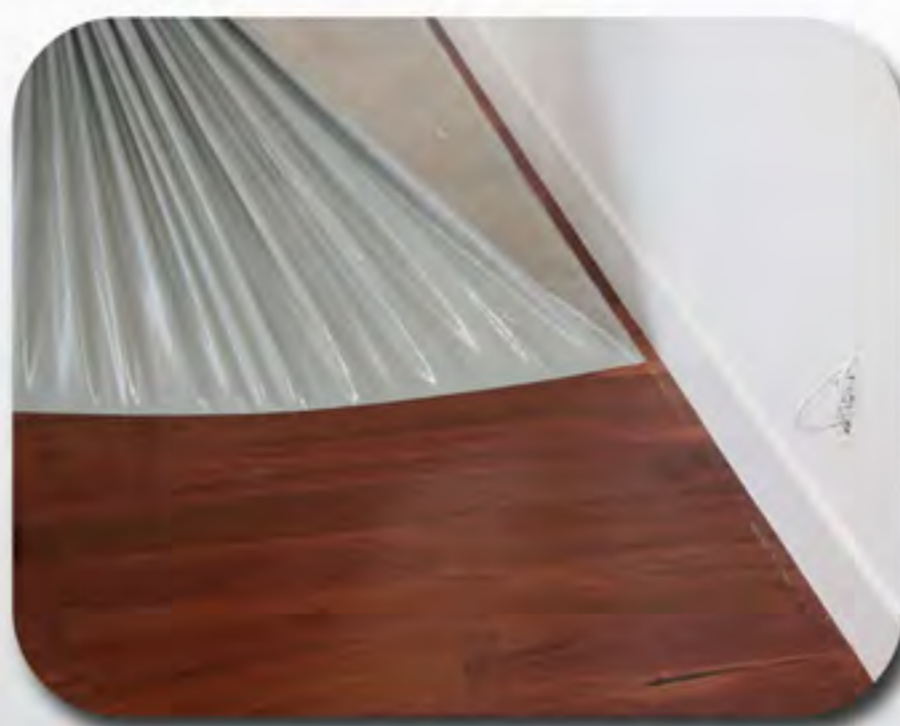

Skudo Floor is suitable for application on almost every surface including:

- ✓ Raw Concrete
- ✓ Polished Concrete
- ✓ Porcelain Tiles
- ✓ Ceramic Tiles
- ✓ Polished Timber
- ✓ Granite
- ✓ Marble
- ✓ Glass
- ✓ Aluminium
- ✓ Steel
- ✓ Vinyl
- ✓ Stainless Steel
- ✓ Terrazzo

### Tiles
